SECTION 1. SAFETY ASSESSMENT Part A. Safety Threat Identification

Directions: The following list of threats is behaviors or conditions that may be associated with a child being in immediate danger of moderate to severe harm. NOTE: At the initial safety assessment, all alleged child victims and all other children residing in the home are to be seen, and if verbal, interviewed out of the presence of the caretaker and alleged perpetrator. If some children are not at home during the initial investigation, do not delay the safety assessment. Complete a new safety assessment on the children who are not home at the earliest opportunity only if the safety assessment changes. If there is no change, indicate so in the "Reclassify Participant" box in PART B.2. For all other safety assessments, all children residing in the home are to be seen, and if verbal, interviewed out of the presence of the caregiver and alleged perpetrator. When assessing children's safety, consider the effects that any adults or members of the household who have access to them could have on their safety. Identify the presence of each factor by checking "Yes," which is defined as "clear evidence or other cause for concern."
