DCFS RISK FACTORS FOR HIV TESTING

- 1. HIV related symptoms.
- 2. A child born to a parent with HIV.
- 3. A child born to a parent with a history of drug use, transfusions or multiple sexual partners.
- 4. A child who was sexually abused with penetration.
- 5. A child born with positive drug toxicology.
- 6. A child with hemophilia or a history of blood transfusions.
- 7. A youth with a history of drug use.
- 8. A youth who is sexually active, at least annually or more frequently if a medical professional considers it to be necessary.
- 9. A child or youth for whom a complete medical history cannot be obtained.

Please report all positive testing results to the DCFS AIDS Project at 312-328-2150.

The temporary caregiver of a child shall not disclose to another person any information received by the temporary caregiver from the Department concerning the results of a test performed on the child to determine the presence of the antibody or antigen to HIV, or of HIV infection.
